

Look On The Bright Side

Look on the bright side - the golden side of everything
Look on the sunny side, and let your feelings change
Suppose you had a car and wherever you looked
 was where the car would go
Life is a lot like that, you know
So look on the bright side... look on the bright side

I think I know what you're telling me... things aren't going too well for you
 but you gotta just look on the bright side
 you got so much to be happy about
I don't want to tell you what you should do... I just want to be happy for you
 When I tell you to look on the bright side
 it's only because it's the best thing for you

Look on the bright side - the golden side of everything
Look on the sunny side, and let your feelings change
Suppose you had a car and wherever you looked
 was where the car would go
Life is a lot like that, you know
So look on the bright side... look on the bright side

I know it isn't too easy just when things aren't going your way
 to turn around and look on the happy side
 but you ought to do it anyway
Maybe in time you will notice it - smiles and laughter will come again
 But if you're gonna see something happening
 you gotta be there to welcome it in

“You know what you gotta do.”

Look on the bright side - the golden side of everything
Look on the sunny side, and let your feelings change
Suppose you had a car and wherever you looked
 was where the car would go
Life is a lot like that, you know
So look on the bright side... look on the bright side

You gotta look, look, look... look on the bright side

“Oh yeah.”
